Camp Description

Changing kids' lives with Java Computer Programming

In one-week sessions, campers will learn the fundamentals of object-oriented programming techniques using "Alice", an innovative 3D programming environment that makes it easy to create an animation and tell a story or play a game. The goal is learn about computers and programming in a fun and rewarding way. Students may sign up for multiple sessions, in which case they will continue learning new material. More advanced topics will be taught in Java.

The camp is appropriate for students entering grades 6 – 12. Class size are small (up to 4 students) and personalized, and are conducted in a modern office building facility in Carmel Valley where students are able to work on powerful, state-of-the-art Apple iMac computers.

Classes are taught by Tammy Neuhaus, a credentialed teacher with nine years of experience teaching Introductory and AP Computer Science courses in the Poway Unified and San Dieguito Union School Districts.

Appropriate for:	Boys and girls entering 6 – 12 th grades
Dates:	Weekly sessions offered weeks of 6/30, 7/7, 7/14, 8/4
Times:	Mon through Fri, 9 am to 12 noon (9 - 12:30, 6/30 week)
Cost per session:	\$300
Location:	Wintriss Technical Schools 12707 High Bluff Drive #200 San Diego, CA 92130
Students interested in individualized lessons may do so by appointment. The hourly rate is \$25/hour.	

Ms. Neuhaus has also been a Reader for the AP Computer Science exam and an advisor to several high school robotics clubs. Previous to teaching, Ms. Neuhaus worked as an electrical engineer for 12 years, developing computer hardware and software.
